Comprehensive Training Manual

Brokerage Operating System

Compliance-Driven Advisory Platform

Covering: System Overview • Modules & Fields • Workflows • Compliance • Glossary

Aligned with COFI and Treating Customers Fairly (TCF) Principles

Edition 2 — April 2026

Current as of the live module set: Contacts, Accounts, Engagements, Policies, Policy Sections, Assets, Risk Details, Claims, Advice Records, Complaints, Reviews, Workflows, Reports, Policy Schedule, Admin.

Table of Contents

Part 1	System Overview
Part 2	Test Phase Instructions
Part 3	Module Reference — Fields & Workflow
	1. Contacts
	2. Accounts
	3. Client Engagements
	4. Policies
	5. Policy Sections
	6. Assets
	7. Risk Details
	8. Claims
	9. Advice Records (ROA)
	10. Complaints
	11. Reviews
	12. Workflows
	13. Reports
	14. Policy Schedule
	15. Admin (Users, Audit Log, Settings)
Part 4	Compliance and Audit Trail
Part 5	Best Practices & Daily Working Rules
Part 6	Glossary of Terms
Part 7	Quick Reference Card

Part 1 — System Overview

Inexpro CRM is a **compliance-driven advisory platform** — not merely a customer-relationship system. It integrates operations, advice, compliance and reporting into a single platform aligned with the **Conduct of Financial Institutions (COFI) Act** and **Treating Customers Fairly (TCF)** principles.

1.1 The four system layers

System Layer	What It Does
Operational Layer	Manages Contacts, Accounts, Policies, Policy Sections, Assets and Claims.
Advice Layer	Client Engagements, Records of Advice, Recommendations and Client Decisions.
Control Layer	Reports, Audit Trail, Compliance Flags, Complaints and Reviews.
Verification Layer	Policy Schedule generation, document generation and email logging.

1.2 Modules at a glance

Module	Purpose
Dashboard	KPI stat cards, charts and upcoming-work tables.
Contacts	Individual people — the starting point for every client journey.
Accounts	Legal or financial entities (individual or commercial).
Client Engagements	Sales / advice pipeline from prospect to implementation.
Policies	Insurance contracts with insurer, dates, premium and banking.
Policy Sections	Per-risk sections of a policy, with needs-analysis and gap tracking.
Assets	Insured items (vehicles, buildings, contents, etc.).
Risk Details	Structured underwriting information about a risk.
Claims	Captured losses with insurer notification and audit trail.
Advice Records	Formal COFI-compliant Record of Advice (ROA).
Complaints	Logged complaints with investigation and resolution tracking.
Reviews	Scheduled client reviews (annual, renewal, claims-driven).
Workflows	Tasks assigned to users, linked to any record.
Reports	Pre-defined and custom queries across all modules.
Policy Schedule	Consolidated PDF schedule for a client, account or policy.
Admin	User management, audit log and system settings.

1.3 Automation & intelligence

Automation is layered across three levels:

- **Level 1** — automatic engagement creation on renewals and claims.
- **Level 2** — risk-based alerts such as coverage-gap identification and delay-flagged claims.
- **Level 3** — intelligent gap detection and advisory prompts.

Advice triggers may be **time-based** (renewals, overdue reviews), **event-based** (new claims, amendments) or **risk-based** (identified gaps or exposures).

1.4 Data integrity principles

Core data rules — always follow these

Never duplicate assets. Each insured item is captured **once**.

Version risk details when they change — do not create new ones.

Every engagement, claim or ROA must reference an existing Contact and/or Account.

Claims are **locked** after settlement — amendments require an audit-trail entry.

Always keep records clean, consistent and complete.

1.5 Compliance foundation

- **Record of Advice (ROA)** — proof that advice was given to the client.
- **Client Engagement** — full history of the interaction and decisions made.
- **Policy Schedule verification** — comparison with insurer-issued schedules.
- **Audit trail** — every create / update / delete is logged with user and timestamp.
- **Complaints register** — COFI-aligned complaint handling and root-cause tracking.

Part 2 — Test Phase Instructions

Important — read before you begin

The system is currently in a **TEST PHASE**.

You do **not** need to capture perfectly accurate or contractual data at this stage.

The purpose is to test how the system works and how information links between modules.

Once the system goes LIVE, all data must be 100% correct.

What you should do

- Use sample or approximate data where you do not yet have the real details.
- Focus on completing **all** fields on each screen.
- Create a variety of client types — personal lines, commercial, agri, transport.
- Capture different scenarios: new business, renewals, amendments, claims, complaints.
- Practise creating Records of Advice, Complaints and Workflows.

What to test

- Cross-referencing between modules (does a Policy link correctly to its Account and Contact?).
- How data flows from Contact → Account → Engagement → Policy → Assets → ROA.
- Whether the Dashboard, Policy Schedule and Reports reflect the data you capture.
- Whether the system correctly flags missing or gap information in reports.
- The email notification and logging functions on Claims, Policies and Accounts.

Getting started — logging in

- Open your internet browser. **Google Chrome** is recommended.
- Enter the Inexpro CRM link provided to you.
- Enter your username and password, then click **Login**.
- If you cannot log in — first check Caps Lock, retype the URL, then try once more before asking for help.

Part 3 — Module Reference: Fields & Workflow

This part documents every module that is currently live in Inexpro CRM. Within each module you will find the list of fields you must complete, the dropdown options to choose from, and the rules that apply.

The Golden Rule

Work from **top to bottom** within each screen. Complete each field before moving on. Every client journey begins with a **Contact** (or Account) and ends with a **Record of Advice**.

Module 1 Contacts

Individual people — your clients, their personal details, compliance state and relationships.

Route: [#/contacts](#)

Contacts are the starting point for almost every journey. Every Policy, Engagement, Claim or ROA links back to a Contact. A missing or incorrect Contact breaks the entire client record.

How to create a Contact

- Click **Contacts** in the left menu.
- Click **+ New Contact**.
- Complete the fields below, working top to bottom. Required fields are marked *.
- Click **Save**.

Personal details

Field	Type / Required	Notes & Options
First Name *	Text, required	Legal first name of the client.
Last Name *	Text, required	Legal surname of the client.
Email	Email	Used for correspondence and ROA delivery.
Mobile	Phone	Primary mobile number.
Work Number	Phone	Office / work landline.
Date of Birth	Date	Used for age-sensitive risk analysis.
SA ID Number	Text (13 chars)	South African identity number.
Title	Text	Mr, Mrs, Ms, Dr, Adv, etc.
Gender	Dropdown	Male; Female.
Language	Text	Preferred language — e.g. English, Afrikaans.
Marital Status	Dropdown	Married; Single; Divorced; Widow.
Occupation	Text	Job title / profession.
Employer	Text	Current employer.
Income Band	Dropdown	R0–R10 000; R10 000–R25 000; R25 000–R50 000; R50 000–R75 000; R75 000+.
Nationality	Text	e.g. South African.
Passport Number	Text	Required for non-SA nationals.
Alternative ID Type	Text	e.g. Passport, Refugee ID.

Field	Type / Required	Notes & Options
Next of Kin	Text	Free text — name and relationship.
Preferred Communication	Dropdown	Email; Mobile; Work.

Classification

Field	Type / Required	Notes & Options
Contact Type *	Dropdown, required	Individual Client; Business Contact Person; Trustee; Member; Director; Employee Contact; Other.
Client Category *	Dropdown, required	Personal Lines; Commercial Lines; Agri; Transport; Mixed; Prospect Only.
Client Segment	Dropdown	A; B; C; VIP; Standard; High Risk; Strategic.
Contact Status *	Dropdown, required	Prospect; Active Client; Inactive Client; Former Client; Do Not Service; Deceased.
Existing Client	Checkbox	Tick if already an existing client.
Date Became Client	Date	Date the client relationship started.
Source of Lead	Dropdown	Referral; Walk-in; Existing Client; Website; Call-in; Social Media; Broker Initiative; Other.

Compliance, assignment & flags

Field	Type / Required	Notes & Options
POPIA Consent Obtained	Checkbox	Tick once consent is captured.
POPIA Consent Date	Date	Shown once consent is ticked.
FICA Status *	Dropdown, required	Not Started; Pending Documents; In Review; Verified; Expired; Exempt.
Assigned Broker *	Dropdown, required	Broker / admin user responsible.
Assigned Admin	Dropdown	Admin user providing support.
Related Account	Dropdown	Link the contact to an Account.
Conduct Risk Flag	Checkbox	Tick if there is a conduct concern.
Conduct Risk Notes	Textarea	Required when the flag is ticked.
Primary Client Record	Checkbox (default ticked)	Marks this contact as the primary record.
Last Review Date	Date	Date of most recent review.
Next Review Date	Date	Scheduled next review.

Physical & postal address

Field	Type / Required	Notes & Options
Street Address	Text	Physical and postal each captured separately.
Complex / Building	Text	Unit, complex or building name.
Suburb	Text	
City	Text	
Province	Dropdown	All 9 SA provinces.

Field	Type / Required	Notes & Options
Postal Code	Text	
Country	Text	Defaults to South Africa.
GPS Latitude / Longitude	Text	Optional — used for risk mapping.

Why this matters

Every Policy, Engagement, Claim and ROA links back to the Contact. Missing or incorrect details break the whole client record and the reports that depend on it.

Module 2 Accounts

Legal or financial entities — individuals or companies that hold policies.

Route: [#/accounts](#)

Accounts represent the **entity** on the policy. For a personal client this is usually the individual; for a commercial client it is the company (e.g. *Smith Logistics (Pty) Ltd*). Link the Account to its Main Contact.

Account details

Field	Type / Required	Notes & Options
Account Name *	Text, required	Full legal name of the entity.
Registration Number	Text	CIPC / CK registration number.
VAT Number	Text	
Business Type *	Dropdown, required	Company; Close Corporation; Sole Proprietor; Partnership; Trust; NPO; School; Church; Body Corporate; Other.
Industry	Dropdown	Agriculture; Transport; Construction; Retail; Manufacturing; Professional Services; Hospitality; Property; Logistics; Other.
Number of Employees	Number	
Annual Turnover Band	Dropdown	Under R1m; R1m–R5m; R5m–R10m; R10m–R50m; Above R50m; Not Disclosed.

Addresses

Capture both the **physical** and **postal** address. Each block asks for Street Address, Complex / Building, Suburb, City, Province, Postal Code and Country. The physical address also accepts GPS Latitude and Longitude.

Relationships, compliance & reviews

Field	Type / Required	Notes & Options
Main Contact	Dropdown	The primary contact on the account.
Assigned Broker *	Dropdown, required	Broker or admin responsible.
Assigned Admin	Dropdown	Admin supporting the account.
Client Status *	Dropdown, required	Prospect; Active Client; Inactive Client; Former Client; Do Not Service.
FICA Status *	Dropdown, required	Not Started; Pending Documents; In Review; Verified; Expired; Exempt.
Date Became Client	Date	
Last Review Date	Date	
Next Review Date	Date	
Notes	Textarea	Free-text notes on the account.

Available from the Account detail page

- Tabs for Contacts, Policies, Assets, Claims, Engagements, Policy Sections, Documents and Timeline.
- **Email** button with template selection and document attachments.
- **Policy Schedule** button to generate the account-level schedule.

Module 3 Client Engagements

Structured advisory pipeline — from prospect to implementation.

Route: [#/engagements](#)

Client Engagements are the container for a client interaction: the reason, the fact-find, the needs analysis, the advice given and the client's decision. Engagements are created automatically for renewals and claims, and can also be created manually.

Core details

Field	Type / Required	Notes & Options
Engagement Name *	Text, required	Descriptive name — e.g. <i>Smith — 2026 Renewal Review</i> .
Type *	Dropdown, required	New Business; Replacement Cover; Additional Cover; Amendment; Renewal Review; Cancellation Review; Claims-Driven Advice; Complaint-Driven Review; Enquiry.
Currency	Dropdown	Defaults to ZAR.
Contact	Dropdown	Individual client on the engagement.
Account	Dropdown	Entity on the engagement.
Source of Lead	Dropdown	Referral; Walk-in; Existing Client; Website; Call-in; Social Media; Broker Initiative; Other.
Stage *	Dropdown, required	Prospect; Initial Contact; Appointment Scheduled; Fact Find Completed; Needs Analysis Completed; Quote / Proposal Prepared; Advice Presented; Client Decision Pending; Accepted — Implementation; Implemented / Active; Lost / Declined; On Hold.
Assigned Broker *	Dropdown, required	Responsible broker.
Assigned Admin	Dropdown	Supporting admin.

Existing cover & risk profile

Field	Type / Required	Notes & Options
Current Insurer	Text	Insurer the client is currently with.
Current Premium	Currency	Value in ZAR.
Existing Cover Summary	Textarea	Summary of cover currently in force.
Identified Risks	Textarea	Risks uncovered during the fact find.
Client Needs Summary	Textarea	What the client needs — plain language.
Risk Priority	Dropdown	Low; Medium; High; Critical.

Process checklist (tick as each step is completed)

- Fact Find Completed • Needs Analysis Completed • Proposal Prepared
- Advice Presented • Disclosure Completed • Policy Wording Provided
- Key Risks Explained • Excess Explained • Premium Explained
- Limitations Explained • Client Questions Answered

Decision, outcome & compliance

Field	Type / Required	Notes & Options
Client Decision	Dropdown	Accepted; Declined; Pending.
Decline Reason	Textarea	Shown when the decision is <i>Declined</i> .
Inception Date	Date	When the new cover starts.
Expected Premium	Currency	Planned annual premium.
Suitability Confirmed	Checkbox	Advice is suitable for the client.
Client Understanding Confirmed	Checkbox	Client understood the advice.
Alternative Options Considered	Checkbox	Alternatives were evaluated.
Conduct Concern Flag	Checkbox	Tick if a conduct concern exists.
Conduct Notes	Textarea	Required when the flag is ticked.
Notes	Textarea	General notes on the engagement.

Stage rule

An engagement cannot progress past **Advice Presented** until **Disclosure Completed** is ticked and a **Client Decision** is recorded. The system will warn you if you try.

Module 4 Policies

Insurance contracts — insurer, dates, premium, assets and banking.

Route: [#/policies](#)

Each Policy belongs to an Account and / or Contact and contains the insurance contract details. Always double-check the Policy Number — an incorrect number cannot be traced against insurer records.

Core details

Field	Type / Required	Notes & Options
Policy Name *	Text, required	Internal descriptive name.
Policy Number *	Text, required	Exactly as issued by the insurer.
Insurer *	Text, required	Insurer company name.
Product Category *	Dropdown, required	Personal Lines; Commercial Lines; Agri; Transport; Engineering; Marine; Liability; Motor Fleet; Other.
Policy Type	Dropdown	Personal; Commercial; Agri; Transport; Mixed.
Policy Status *	Dropdown, required	Pending; Active; Amended; Cancelled; Lapsed; Expired.
Currency	Dropdown	Defaults to ZAR.
Contact	Dropdown	
Account	Dropdown	
Client Engagement	Dropdown	Optional — link to the engagement that led to this policy.
Cover Description	Textarea	Plain-language description of cover.
Total Premium	Currency	Auto-calculated from Policy Sections.

Dates, assignment & disclosure

Field	Type / Required	Notes & Options
Inception Date *	Date, required	
Renewal Date	Date	
Last Review Date	Date	
Next Review Date	Date	
Assigned Broker *	Dropdown, required	
Assigned Admin	Dropdown	
Disclosure Completed	Checkbox	Tick once disclosures are complete.

Co-insured & banking / payment

Field	Type / Required	Notes & Options
Co-Insured Name	Text	
Co-Insured ID Number	Text (13 chars)	
Payment Method	Dropdown	Debit Order; EFT; Credit Card; Cash; Cheque.
Premium Frequency	Dropdown	Monthly; Quarterly; Bi-Annual; Annual.
Debit Order Date	Text	e.g. 1st, 15th, 25th of the month.

Field	Type / Required	Notes & Options
Bank Name	Text	
Branch Code	Text	
Account Number	Encrypted	Stored securely — not displayed in plain text.
Account Holder Name	Text	

Inline features on the policy screen

- **Policy Assets** panel — add insured items directly while creating the policy.
- **Email** button — send branded correspondence with document attachments.
- **Policy Schedule** — generate a consolidated PDF for this policy.
- Tabs: **Assets**, **Policy Sections**, **Claims**, **Timeline**, **Documents**.

Module 5 Policy Sections

Per-risk sections of a policy, with needs analysis and gap tracking.

Route: [#/policy-sections](#)

A Policy is broken down into Sections (e.g. Motor, Buildings, Household Contents, Public Liability). Each Section records whether the risk exists, whether the client is covered for it, and whether a gap has been identified.

Core details

Field	Type / Required	Notes & Options
Section Name *	Text, required	e.g. <i>Household Contents — Main House.</i>
Policy *	Dropdown, required	The parent policy.
Currency	Dropdown	Defaults to ZAR.
Contact	Dropdown	
Account	Dropdown	
Asset	Dropdown	Linked asset (if applicable).
Section Type *	Dropdown, required	30+ options including Personal Motor, Household Contents, Buildings, Commercial Motor, Public Liability, Goods in Transit, Business Interruption, Electronic Equipment, etc.
Section Category *	Dropdown, required	Personal Lines; Commercial Lines; Transport; Liability; Specialist.

Needs analysis (tick as applicable)

- Risk Exists • Cover Required • Currently Covered
- Recommended for Cover • Implemented
- Gap Identified — *automatically ticked when the risk exists, cover is recommended, but not implemented.*

Gap, decline & other fields

Field	Type / Required	Notes & Options
Gap Severity	Dropdown	Low; Medium; High; Critical. Shown when gap identified.
Gap Description	Textarea	Details of the gap.
Client Declined Recommendation	Checkbox	Shown when recommended but not implemented.
Decline Reason	Textarea	Required when the client declined.
Action Required	Textarea	What still needs to happen.
Notes	Textarea	

Module 6 Assets

Insured items — vehicles, buildings, contents, equipment and more.

Route: [#/assets](#)

Critical rule — no duplicate assets

Each insured item must appear **once**. If an asset already exists, update the existing record — do not create a new one. Duplicates corrupt the policy schedule and cause reporting errors.

Core details (always shown)

Field	Type / Required	Notes & Options
Asset Name *	Text, required	Short descriptive name.
Asset Type *	Dropdown, required	Motor; Property; Fire; Liability; Goods in Transit; Engineering; Accident & Health; Miscellaneous; Agriculture; Marine; Aviation; Guarantee; SASRIA.
Policy	Dropdown	Policy that insures the asset.
Asset Status *	Dropdown, required	Active; Sold; Written Off; Stolen; Decommissioned; Other.
Contact	Dropdown	
Account	Dropdown	
Asset Section	Dropdown	Policy section type — list filters by Asset Type.
Asset Value	Currency	Sum insured.
Premium	Currency	Section premium for this asset.
SASRIA	Currency	SASRIA portion of the premium.
Notes	Textarea	

Vehicle / item details (shown when Asset Type is a vehicle)

Field	Type / Required	Notes & Options
Registration Number	Text	Motor, GIT, Marine, Aviation, Agriculture.
VIN Number	Text	Motor, Goods in Transit.
Engine Number	Text	Motor, GIT, Engineering, Marine, Aviation, Agriculture.
Make / Model / Year	Text	Captured as three separate fields.
MM Number	Text	Motor, Goods in Transit.
Fleet Number	Text	Motor, Goods in Transit.
Financial Interest Name & Address	Text	Bank or financier with an interest in the asset.

Building / structure details (Property, Fire, Agriculture)

Field	Type / Required	Notes & Options
Address *	Text, required	Physical address of the building.
City *	Text, required	
Province	Dropdown	
GPS Latitude / Longitude	Text	Optional.

Field	Type / Required	Notes & Options
Serial Number	Text	Property, Fire, Engineering, Miscellaneous, Marine, Aviation.

Section-specific attributes

Depending on the Asset Section you pick, additional attributes appear. Examples:

- **Motor:** use type, GVM, tracking device, territory, cover type, regular driver, credit shortfall.
- **Property / Buildings:** construction type, roof type, occupancy, number of floors, perils covered, subsidence cover, geyser cover, security measures.
- **Contents:** contents category, unspecified / specified items, theft extension, power-surge cover, security measures.
- **Stock:** stock category, declaration basis, cold storage, average and maximum stock values.
- **Electronic Equipment:** replacement value, portable flag, maintenance contract, breakdown cover.
- **Watercraft:** vessel name, vessel type, hull length.
- **Vehicle extras:** tracking device fitted, immobiliser, steering lock, security system, regular garaging, excess and excess waiver.

Module 7 Risk Details

Structured underwriting information describing a risk.

Route: [#/risk-details](#)

Risk Details give the insurer a clear picture of the risk — how it is constructed, how it is protected, where it is exposed. These fields drive accurate cover and defensible advice.

Core details

Field	Type / Required	Notes & Options
Risk Detail Name *	Text, required	
Risk Type *	Dropdown, required	Motor Risk; Building Risk; Goods in Transit Risk; Marine Risk; Liability Risk; Personal Possessions Risk; Electronic Equipment Risk; Other.
Asset	Dropdown	Link to a specific asset.
Policy Section	Dropdown	
Policy / Contact / Account	Dropdown	Free-linking to any of these.

Risk-type specific fields

Field	Type / Required	Notes & Options
Motor Risk	Fields	Stored / Parked Overnight; Tracking Device Fitted (Yes / No); Route / Operating Area.
Building Risk	Fields	Occupancy / Use; Construction Type; Roof / Wall Construction; Distance to Water; Flood Exposure (None – High); Fire Exposure (None – High).
Goods in Transit	Fields	Goods / Load Type; Maximum Exposure Value; Route / Operating Area; Security Details.
Marine / Liability / Personal Possessions / Electronic Equipment	Fields	Similar risk-specific fields tailored to each category.

Version control

Risk Details are **versioned** when they change. Do not create a new record for an existing risk — edit the existing one and the system keeps a full version history with timestamp and user.

Module 8 Claims

Register, track and report claims from notification through settlement.

Route: [#/claims](#)

Core details

Field	Type / Required	Notes & Options
Claim Number *	Text, required	Use the insurer's reference where possible.
Claim Status *	Dropdown, required	Notified; In Progress; Awaiting Documents; Settled; Rejected; Closed; Disputed.
Policy *	Dropdown, required	The policy the claim is against.
Currency	Dropdown	Defaults to ZAR.
Contact / Account / Asset	Dropdown	Link to any or all.
Broker	Dropdown	
Claims Handler Name	Text	The insurer-side handler.
Claim Type *	Dropdown, required	Motor; Property; Liability; GIT; Theft; Fire; Other.

Incident, settlement & follow-up

Field	Type / Required	Notes & Options
Claim Date *	Date, required	Date the incident occurred.
Date Reported *	Date, required	Date the claim was notified.
Incident Description *	Textarea, required	Detailed description of what happened.
Estimated Value	Currency	Estimated rand value of the claim.
Settled Date	Date	Shown when the status is <i>Settled</i> .
Claim Settlement Value	Currency	Amount paid by the insurer.
Settlement Notes	Textarea	
Delay Flag	Checkbox	Tick if the claim is delayed.
Delay Reason	Textarea	Required when the flag is ticked.
Linked Advice Record	Dropdown	Link to the ROA that relates to this claim.
Notes	Textarea	

Workflow features

- **Email notification** — report the claim to the insurer directly from the screen; the send is logged automatically with date, time and sender.
- **Timeline** and **Documents** tabs on the claim detail page.
- Delay-flagged claims appear on the dashboard and in the *Claims with Delay Flags* report.

After settlement

Claims are **locked** after settlement. No editing is permitted once the status is *Settled*. Controlled amendments are possible but every change appears in the audit trail.

Module 9 Advice Records (ROA)

COFI-compliant Record of Advice: needs, recommendation, disclosure and decision.

Route: [#/advice-records](#)

The Record of Advice is your **formal proof** that advice was given to the client. Every advice interaction must have an ROA. The ROA protects both the client and the brokerage.

Record details

Field	Type / Required	Notes & Options
Advice Record Number	Auto-generated	Read-only on save.
Advice Date *	Date, required	
Advice Type *	Dropdown, required	New Business; Amendment; Cancellation; Review; Claims-Driven Advice.
Trigger Event	Dropdown	Client Engagement; Policy Amendment; Cancellation; Review; Claim; Enquiry.
Currency	Dropdown	Defaults to ZAR.
Contact / Account / Engagement / Policy	Dropdown	Free-linking to any of these.
Broker *	Dropdown, required	Broker who gave the advice.
Prepared By *	Dropdown, required	Defaults to current user.

Needs analysis (required narrative)

Field	Type / Required	Notes & Options
Client Needs Identified *	Textarea, required	What the client needs and why.
Risk Analysis Summary *	Textarea, required	The risks analysed.
Current Cover Considered	Textarea	Existing cover reviewed.
Shortfalls Identified	Textarea	Gaps uncovered.

Recommendations (required narrative)

Field	Type / Required	Notes & Options
Recommendation Given *	Textarea, required	What you recommended.
Alternative Options Considered	Textarea	Other options looked at.
Reason Product is Suitable *	Textarea, required	Why your recommendation fits.
Consequences of Not Proceeding	Textarea	What happens if the client does nothing.

Disclosures (tick each that applies)

- Risks Explained to Client • Costs Explained to Client • Excess Explained to Client
- Waiting Period & Limitations Explained • Exclusions Explained to Client
- Client Understanding Confirmed • Fair Outcome Considered

Client decision & documentation

Field	Type / Required	Notes & Options
Client Decision	Dropdown	Accepted; Declined; Deferred; Pending.
Decision Date	Date	
Decision Notes	Textarea	
ROA Generated	Checkbox	Tick once the branded ROA is produced.
ROA Generation Date	Date	
Final Document Issued	Checkbox	
Issue Date	Date	
Client Acknowledgement Received	Checkbox	
Acknowledgement Date	Date	
Notes	Textarea	

Compliance warning

An incomplete ROA is a compliance failure. If advice was given — in any form — an ROA must exist. The branded ROA document can be emailed directly from the Account screen, and the send is logged automatically.

Module 10 Complaints

Register, investigate and resolve client complaints — COFI aligned.

Route: [#/complaints](#)

Core details

Field	Type / Required	Notes & Options
Complaint Date *	Date, required	
Status *	Dropdown, required	Open; In Progress; Awaiting Response; Resolved; Closed; Escalated.
Category	Dropdown	Service Quality; Incorrect Advice; Claims Handling; Premium Dispute; Policy Cancellation; POPIA Breach; Conduct; Other.
Received Via	Dropdown	Email; Phone; Letter; In Person; Online Form; Regulator; Other.
Contact / Account / Policy	Dropdown	Link to any or all.
Complaint Summary *	Textarea, required	Description of the complaint.

Investigation, resolution & follow-up

Field	Type / Required	Notes & Options
Assigned To	Dropdown	Person responsible for investigation.
Investigation Notes	Textarea	
Root Cause Category	Dropdown	Process Failure; Communication Failure; System Error; Human Error; Policy Terms; Third Party; Other.
Root Cause Description	Textarea	
Resolution Date	Date	Shown when status is Resolved / Closed.
Resolution Summary	Textarea	
Compensation Offered	Currency	
Compensation Status	Dropdown	Not Applicable; Approved; Paid; Declined.
Follow-Up Required	Checkbox	
Follow-Up Due Date	Date	Shown when follow-up is required.
Notes	Textarea	

Module 11 Reviews

Scheduled client policy and financial reviews.

Route: [#/reviews](#)

Fields

Field	Type / Required	Notes & Options
Review Number	Text	Auto-generated, can be overridden.
Review Date *	Date, required	
Review Type *	Dropdown, required	Annual Review; Mid-Year Review; Renewal Review; Claims Review; Ad Hoc Review; Complaint Review.
Contact / Account / Policy	Dropdown	Link to any or all.
Reviewed By	Dropdown	User performing the review.
Coverage Summary	Textarea	Summary of cover at the time of review.
Identified Gaps	Textarea	
Client Needs Assessment	Textarea	
Review Completed	Checkbox	
Completion Date	Date	Shown when completed is ticked.
Review Outcome	Dropdown	No Changes Required; Changes Recommended; Urgent Action Required; Policy Cancelled; Follow-Up Required.
Recommended Actions	Textarea	
Follow-Up Date	Date	
Follow-Up Status	Text	
Notes	Textarea	

Module 12 Workflows

Tasks assigned to users, linked to any record in the system.

Route: [#/workflows](#)

Fields

Field	Type / Required	Notes & Options
Description *	Text, required	What needs to be done.
Due Date	Date	When the task is due.
Status *	Dropdown, required	Assigned; Open; In Progress; On Hold; Completed.
Responsible Person	Dropdown	User the task is assigned to.
Contact / Account / Policy / Asset / Claim	Dropdown	Link the task to any record. Contact and Account are mutually exclusive.
Notes	Textarea	

Detail page actions

- **Mark Complete** — quickly flip the status to *Completed*.
- **Start** — set the status to *In Progress*.
- Workflow tasks feed the **Upcoming Tasks** table on the Dashboard. Items within 3 days are amber; overdue items are red.

Module 13 Reports

Pre-defined reports, a custom report wizard and saved reports.

Route: [#/reports](#)

Pre-defined reports

Report	What it shows
Clients with Overdue Reviews	Clients whose Next Review Date has passed.
Policy Sections with Identified Gaps	Sections where cover is recommended but not implemented.
Sections Recommended but Declined	Sections the client has declined — useful for follow-up.
Claims with Delay Flags	Claims the broker has flagged as delayed.
Complaints by Category and Root Cause	Complaint volumes grouped for analysis.
High-Severity Conduct Concerns	Contacts or engagements flagged for conduct risk.
Policies Due for Renewal	Policies whose Renewal Date falls in the chosen range.
Open Client Engagements by Stage and Broker	Live pipeline view grouped by stage and responsible broker.

Custom report wizard

- **Step 1 — Source:** choose the module to query.
- **Step 2 — Fields:** pick the columns you want.
- **Step 3 — Filters:** add any number of filter rows. Operators include equals, not equals, contains, is empty, greater than, less than, between, is one of.
- **Step 4 — Sort & Group:** choose sort direction and an optional group-by field.
- **Step 5 — Run / Save:** run the report and optionally save it (private or shared).
- Every run and every export (CSV) is written to the audit trail.

Module 14 Policy Schedule

Consolidated PDF schedule for a contact, account or policy.

Route: [#/schedule/...](#)

The Policy Schedule produces a branded PDF that lists every active policy, its sections and its insured assets. Use it to verify the data in the system against the insurer's own schedule, or to send a consolidated overview to the client.

How to use it

- From an **Account**: click **Policy Schedule** on the detail page.
- From a **Contact** or **Policy**: use the corresponding action button.
- Review the on-screen preview; download the PDF or email it directly.
- Discrepancies with the insurer schedule must be resolved and the internal records updated.

Module 15 Admin

User management, audit log and system settings.

Route: [#/admin](#)

User management (full admin only)

Field	Type / Required	Notes & Options
Full Name *	Text, required	
Username *	Text, required	Used for login.
Email *	Email, required	
Password *	Password	Required for new user; optional on edit.
Role	Dropdown	Admin; Broker; Admin Only.
Active	Dropdown	Active; Inactive.

You cannot delete your own account.

Audit log (full admin only)

- Every CREATE, UPDATE, DELETE, LOGIN, LOGOUT and EXPORT is logged.
- Filter by **Module**, **Action** and **Date Range**.
- Expand any row to see the **before** and **after** values.
- Entries cannot be altered or deleted — this is by design.

Settings (all users)

- **Appearance:** toggle between light and dark mode.
- **Email / SMTP** (admin only): host, port, username, password, from-address; *Test Connection* button.
- **From Email Addresses** (admin only): per-user mappings of user → sending address.
- **Email Templates:** create, edit and categorise templates using placeholders ({{client_name}}, {{first_name}}, {{account_name}}, {{policy_number}}, etc.).

Part 4 — Compliance and Audit Trail

Inexpro CRM is a compliance-driven platform. Every action you take is recorded and traceable. This section explains what this means for your day-to-day work.

4.1 Why compliance matters

- Inexpro CRM is aligned with the **COFI Act** and **TCF** principles.
- Regulators may request evidence of advice given, decisions made and processes followed.
- An accurate audit trail is your legal protection.
- Incomplete records can result in regulatory findings against the brokerage.

4.2 The audit trail

Every change made in the system is logged with:

- The **date and time** of the change.
- The **user** who made it.
- The **previous value** and the **new value**.
- The **module** and **action** (CREATE / UPDATE / DELETE / LOGIN / LOGOUT / EXPORT).

The audit trail cannot be altered or deleted. This is by design.

4.3 Policy schedule verification

Generate an internal Policy Schedule and compare it to the insurer-issued schedule. Discrepancies should be resolved and records corrected. The process confirms accuracy of cover details, identifies errors in insurer schedules and produces a client-ready output.

4.4 Complaints handling

Complaints are registered, investigated, resolved and closed. Root-cause categorisation and compensation tracking are required for COFI reporting.

Part 5 — Best Practices & Daily Working Rules

5.1 Working habits

- Work slowly and carefully — speed causes errors.
- Save regularly — do not wait until the end of a session.
- Always complete fields from top to bottom within each screen.
- Do not duplicate records — check before creating anything new.
- Always check your work before logging off.

5.2 When to ask for help

Help protocol — follow this before asking

1. Try to solve the problem yourself first.
2. Clearly describe what you were doing when the problem occurred.
3. Note the exact error message or unexpected behaviour.
4. Take a screenshot if possible.
5. Only then ask for assistance.

5.3 Completeness checklist

Step	Status to achieve
Contact	Created and saved
Account	Linked where applicable
Engagement	Stage, decision and disclosures captured
Policy	Captured with correct number, dates and premium
Policy Sections	All risk sections added with needs analysis
Assets	All insured items captured once
Risk Details	Completed and version-controlled
Claims	Captured, reported and logged
Record of Advice	Completed, generated and acknowledged
Complaints	Captured, investigated and resolved
Reviews	Scheduled, completed and outcome recorded
Workflows	Due dates set, status kept up to date
Reports	Reviewed regularly for gaps and overdue items

Part 6 — Glossary of Terms

Use this glossary whenever you encounter an unfamiliar term in Inexpro CRM.

Term	Definition
Account	The legal or financial entity linked to the client. An individual or a company.
Advice Record (ROA)	A formal compliance document recording what advice was given, the needs analysis, recommendations, disclosures and the client's decision.
Asset	An insured item — for example a vehicle, building, item of stock or piece of equipment.
Audit Trail	A complete history of every change made in the system — who, when and what changed.
Claim	An event where the client suffers a loss and requests payment from the insurer.
Client Engagement	A structured record of an interaction with a client, covering the reason, discussion, fact-find, advice and decision.
COFI	Conduct of Financial Institutions Act — the regulatory framework governing how financial services are delivered to clients.
Complaint	A formally logged expression of dissatisfaction from a client, with investigation and resolution tracked to closure.
Contact	The individual person you deal with — the client or a person within a client entity.
Dashboard	The home screen. Displays KPI stat cards, charts and the upcoming-work tables.
FICA	Financial Intelligence Centre Act — the anti-money-laundering regime that requires client verification.
Policy	The insurance contract issued by the insurer to the client.
Policy Section	A granular part of a policy covering a specific risk (e.g. Motor, Buildings, Liability) with its own needs analysis and gap tracking.
Policy Schedule	A consolidated PDF summary of all policies and their insured assets, used to verify data against the insurer and communicate with the client.
POPIA	Protection of Personal Information Act — requires client consent for processing personal information.
Report	A pre-defined or custom system-generated summary used to check information and identify issues.
Review	A scheduled check-in — annual, mid-year, renewal, claims-driven or ad hoc.
Risk Details	Structured underwriting information describing a risk — construction, security, exposure and use.
ROA	See Advice Record.
SASRIA	South African Special Risks Insurance Association — covers special perils such as riot and strike.
TCF	Treating Customers Fairly — the regulatory principle requiring that clients are treated honestly and in their best interests.
Version Control	The practice of tracking changes to a record over time rather than deleting and recreating it.

Term	Definition
Workflow	A task in the CRM, assigned to a user, with a due date and status. May link to any record.

Part 7 — Quick Reference Card

Use this card as a daily reminder of the correct workflow and key rules.

Correct order of capture

Step	Action
Step 1	Contact — create the individual client.
Step 2	Account — link the legal / financial entity.
Step 3	Client Engagement — open the advisory interaction.
Step 4	Policy — capture the insurance contract.
Step 5	Policy Sections — break the policy into risk sections.
Step 6	Assets — add every insured item (only once!).
Step 7	Risk Details — describe the risk.
Step 8	Record of Advice — document the advice given.
Step 9	Claims — capture and report losses when they happen.
Step 10	Complaints — register and resolve if they arise.
Step 11	Reviews — run scheduled check-ins.
Step 12	Workflows — track outstanding tasks.
Step 13	Reports — verify completeness and surface gaps.

Non-negotiable rules

- No duplicate Assets, Contacts or Accounts.
- Version Risk Details — never duplicate.
- Every advice interaction must have an ROA.
- Claims are locked after settlement.
- Save regularly — every 5 minutes of work, at a minimum.
- Work from top to bottom in every screen.
- Disclosure and Client Decision are required to progress past *Advice Presented*.
- POPIA consent must be captured before any direct marketing.

Remember

Inexpro CRM is your compliance system as much as your operational tool.

Accurate records protect **you, your clients, and the brokerage**.

If in doubt — check, don't guess.
